

POST LOCATED WITHIN HINGE POINT

POST LOCATED BEYOND HINGE POINT

NOTES:

1. Marker post to be timber, tubular steel, steel or any departmental compliant product installed in accordance with the manufacturer's specifications and in accordance with the requirements shown in Standard Drawing 1356.
2. Delineators to comply with the requirements specified in MRTS14 with the exception of being reduced to an overall area of 5000mm². with minimum width of 50mm. Delineators are only required to be attached to the maintenance marker posts when those posts are installed between the shoulder edge and the hinge point. Delineators shall not be used for installations beyond the hinge point. Red delineators to be located on the left hand side and White delineators to be located on the right hand side as seen by approaching driver.
3. Marker posts are used to indicate any item that requires regular maintenance (e.g. culvert headwall, subsoil drain outlet). Markers to also be used to indicate the position of any object which may otherwise be damaged by the operation of maintenance machinery (e.g. table drain block, public utility service installation, bench mark).
4. Marker post location to be at, or as near as practicable to the object being marked. If the marker post at the object is not readily visible from the pavement or may be obscured by vegetation, a secondary marker post supporting a delineator is to be positioned between the shoulder edge and the hinge point.
5. For hazard marker installation refer to standard drawing 1851.
6. Dimensions are in millimetres unless shown otherwise.
