

Brisbane Valley Highway safety improvements

Final design

November 2022

LEGEND

- Wide centre line treatment, vegetation clearing
- Package 1
- Package 2
- Police enforcement bay
- Safer intersection
- Embankment works

Police enforcement bay

A police enforcement bay will be located south of the Glamorgan Vale Road intersection for the Queensland Police

Wide centre line treatment

Some sections of the road between Warrego Highway and Fernvale will be widened to accommodate the wide centre line treatment. The wide centre line treatment provides additional separation of traffic travelling in opposite directions to reduce the risk of head on crashes.

Safer intersections

Dedicated right-turn and left-turn lanes at the Ironbark Road and Borallon Station Road intersections and a left-turn lane at the Glamorgan Vale Road intersection to allow through traffic flow while turning traffic can safely wait to turn into side roads.
